Quest Learn Test Document

This is a test PDF for verifying text extraction.

Chapter 1: Introduction to Machine Learning

Machine learning is a subset of artificial intelligence that enables systems to learn and improve from experience without being explicitly programmed. It focuses on developing algorithms that can access data and use it to learn for themselves.

Chapter 2: Supervised Learning

Supervised learning is a type of machine learning where the model is trained on labeled data. The algorithm learns a mapping from inputs to outputs based on example input-output pairs.

Chapter 3: Neural Networks

Neural networks are computing systems inspired by the biological neural networks in animal brains. They are the foundation of deep learning and are used for tasks like image recognition and natural language processing.

This document contains sufficient extractable text for testing purposes.
